

HYZ ENERGY

# HYDRAULIC

Hydraulics is a machine with which every single industry in the world is familiar with if not then for a quick tour Hydraulics were found in 1795 and were soon replaced to forged metal that was the first time Hydraulic took over the job of Steam hammering after that Hydraulics replaced labour work in construction manufacturing and many other as well Hydraulics became the center of attention for industries very fast but this machine value was not truly specified during its uses they were just replaced where hard and strong working was needed but no one had thought the Hidden values of how a Hydraulic Works even if they knew they would not take it to any other industry.

# HISTORY WORK

The True Value of Hydraulic was just ended because if it's true use would have came out this would be an unstoppable project that can give resources for many years the Hydraulic is the world's only machine that doubles power from a small input but what if we give the double amount of power from one hydraulic to another the double power will be quadrupled by just adding one more Hydraulic so as can be seen with a small amount of input you are receiving 4 times more from that this feature can only be found in Hydraulics.

# HYDRAULIC'S USE

HYDRAULICS have been misused for their strength as with strength it gives you power as well and if this power is Altered the right way it can induce Electricity more than the Nuclear Fusion which is still just an idea on which more than 30 Billion has been and still the chances of its working or coming into existence is nowhere near till more 50 - 60 years so this time and money is being spent on a work that was already made but was not recorded because of which we are suffering today but this Hydraulic need very less attention in many industries will have a new way of using HYDRAULIC in many ways

# HYZ Energy

WE HYZ Energy found the main secret behind the true working of HYDRAULIC & created a Renewable, Portable & Endless Source of Generating electricity through HYDROCELL which is a Machine That is Patented in 196 Countries around the world and has experience since 2011 and started working in 2012 and came into its full form by 2020 HYDROCELL uses the Laws of Oscillation, Rotation and Kinetic Energy to turn the power we receive from our custom designed built Hydraulic into electricity through a process which give us as much as pressure we require to have a stable electricity production not only that but HYDROCELL also lets us generate Electricity from it 24/7 without need to take break with low maintenance after 10 years with just a input of 24 V we will be able to give 100KW - 20 MW in size of GENERATOR and above till the limit of your Desire insize of Stations

# HYZ Energy WORK

We HYZ Energy had been familiar with HYDRAULICS & HYDROENERGY since 2011 for which reason we knew a combination of two World best Renewable Sources of energy could be the Best Machinery that can be introduced in the Market that's Why We HYZ Energy started to work on a machinery that could give a Endless Stable Renewable Electricity which is portable as well so that why Project HYDROCELL was started in 2012 and had gone through 2500 small & big experiments and a lot of funding as well

# HYZ Energy Motive

We HYZ Energy knew that the biggest crises of the world after food was electricity as there are more than 1.2 billion of the world population live without electricity access which is a very large number because there are only 9 billion population in total so to give electricity to the unreachable point the world is trying to its best but can't succeed because of which they have to go the other way and generate electricity through harming the environment since 1985 because if that now we are at a state that our generation can't see or even know about the Extinct species of plants and animals but to prevent a situation from occurring again we had built a portable and renewable way of generating Electricity through HYDROCELL.

# HYDROCELL

We have built HYDROCELL in a unique and pleasant way the top Quality Built HYDROCELL makes it last 20 year and more Minimum with very low Maintenance only if needed which can be done by anyone the Main Maintenance will be done by HYZ Energy & their Dealers only the Heart of HYDROCELL is Water & Hydraulic which are built and joined in a totally unique way as our arrangement or use of Hydraulics in HYDROCELL is in such a way that we get 6x times increased power from just one step we are able to get the Height and flow rate of a large Dam from HYDROCELL which indicates that using HYDROCELL in other industries Will turn out to be beneficial as well.

# MISSION

HYDROCELL will be able to be used in Cars, Planes, Boats Industries where Pumps are Needed & many many more Industries We HYZ Energy not only will be Supporting the Environment with HYDROCELL but we will be able to play a very Huge role in Bringing the Market of the World on to its feet Very Fast. If there is any More Information you need From HYZ Energy about HYDROCELL or us Feel free to ask on our website Contact page

**WE ARE HYZ ENERGY**

**OUR AIM IS TO PROVIDE A CLEAN ENDLESS AND  
RENEWABLE  
WAY OF GENERATING ELECTRICITY**

**CONTACT DETAILS**

**NUMBER : ( +974 ) 55822034 , ( +974 ) 33887300**

**Land Line : ( +974 ) 4486 0706**

**Fax : ( +974 ) 4017 5363**

**WE HYZ ENERGY HAVE AN AIM TO REMOVE THE DARKNESS OF THE WORLD  
WITHOUT POLLUTING THE ENVIRONMENT.**
