

HYZ ENERGY

POSITIVITY

As the world right now might be on a shutdown but on the other hand the world is also healing from all of the Harm that have been done from the Past 20 Years as after Year 2000 the Rate of All Harmful gases and Animal Rare Species Being Extinct has been so Common that about 30 Different Species of Animal's and About 75 Plants Species and About 5 well know Places Have all gone extinct just because of the Needs of the Human kind which Include Electricity Being on the top Of the List in order for ManKind to live, Electricity is being used to everywhere from breathing - Living, but Electricity is not the Main reason for all of these Problems The Problem is From the Ways it is being Made as the Ways Of generating electricity is not Safe for the World even the Renewable ways also as they give negative and Positive effects to the World in which Positive Points are less And more Of negative Points.

COVID_19 CORONAVIRUS

This Virus has Taken all the World in its Trap and is Still spreading Through the Human Kind but on the other side it's not even affecting the Wild life so to think this virus is planted or not planted we can't give a strong statement but to be Familiar to it we will have to have ideas to save Other Personalities in our society E.G our Elder Personalities and Unmature Kids so ways to find those ideas will be available if we will be Working from now and have a ideas for the upcoming days when the Virus threat will be over then we all will have to stay together and make a path to bring the Market on its feet again as soon as possible as the Market has gotten so much Damage and Downfall already and more will not be affordable, We need Your Ideas As well.

Our Idea

We have Brought Famous Minds Together And Wanted to have a Solution for a Better tomorrow So we had Many Ideas That were Among the Thinking of Many Scientist But We Still wanted A break That should not only work in one place or in a specific Environment & Industry But Which Will be able to work in all Main fields by any Means, Because of Many reason we were not able to have all in one feature Machinery For many years But sometimes the smallest things in the world do seem small but always behind every small work there is a Past/Working done to it so we were amazed to see how a small wave from a very far distance that is made from a Boat or Wind can turn into a Tide or tsunami one day but through some forces it really does which is so unbelievable that a small wave or a small push of a wind can create such great Destructive Natural Disaster Maker but it can so Our conclusion was to find a device that can handle a lot of force yet be able to double the power on every stage for that reason we Chose HYDROPOWER

OUR STORY

We HYZ Energy wanted to Help the World and make a Product that will not harm Living, Non Living, Environment & Humanity so we took Years of Data on what is the Product that is the Most harmful out off all and our analyses came to a point that the world Greatest Reason of Pollution is through

1. House & Business Electricity Usage through Alternative ways.
2. Transport & other Small Factors,

So in order to have Usage of Electricity and make A engine that does not produce Harm we came up with a solution that will be able to work as a Engine, Pump & Generator which means a combo that will be able to give power to all the Rare and Common Industry around the world and reduce the overall pollution from transport 85%, House & Business 95% this was a thought till 2012 but has become reality in 2020

Our Mission

As much as we needed to get into the idea of creating electricity in a lot cheaper and environment friendly way we also wanted to make it as clean as we can and not waste the natural resources that will be used so we came up with an idea in 2011 we executed the idea and made a machine till 2012 it took this much time because we did not have any blueprint or a sketch or a ready made model so in order to make an idea into reality we were on our best speed the Model that was created in 2012 was built in such way that it was able to work by taking 35 % input and give 65 % output which was the result that we already had with the already built machines in the world so then we created another model in 2013 that model had a problem that it needed a continuous flow of water in order to work which was not possible as we wanted a portable, silent & Convenient Machine.

Our Work

In 2015 we built a model that was fully operational by using the method of circulation but it was using a lot of input Energy and low output So we had to change the model as it was not as we wanted so after 4.2 Years we made a Machine and Named it HYDROCELL the Name Only tells almost all about the Machine Hydro for our idea was using Water and process of Hydropower, Cell as all the components inside look like cell, the main component are HYDRAULICS, TURBINE, ALTERNATOR & WATER, we had been trying to work out a model just like this for the world in order to be able to get it out and running in the market so we used the Method Of OSCILLATION to convert the Mechanical energy of HYDRAULICS into Electrical or Usage Energy so we did it and proved some of the Theories wrong as well that cant be Disclosed For some reasons.

HYDROCELL

We HYZ Energy company Finally had Brought our Idea into reality by Building a model in 2020 Which was able to bring the Pressure from 1000 Meter height into a Small compact HYDROCELL which is Portable, Effective, Cheap, Renewable & Environment Friendly Machine HYDROCELL only needed 24V to Make 100KW - 20 MW in size of a Generator and above in size of a Station can be made in customer's Willing size. HYDROCELL can be Placed Anywhere Until the Base Of the Machine is on Flat ground a little Uneven is acceptable.

MECHANISM

So Finally our Work & Idea came into Reality and is now out and ready to be provided to the Society We HYZ Energy have Finally gave a new Meaning to the Term All in One as Our Machine HYDROCELL will be able to be used in Cars, Planes, Boats Industries where Pumps are Needed & many many more Industries We HYZ Energy not only will be Supporting the Environment with HYDROCELL but we will be able to play a very Huge role in Bringing the Market of the World on to its feet Very Fast so we HYZ Energy whoud Like to have you Suggestions On our This Invention the More Spread the More Better.

We HYZ Energy know that we Might have changed the Course Of Industry but in this Mightly Great Populated world we know that there are and will be Great minded Personalities so we would love to hear Ideas that will Be able to Change History Again Our Idea was Made and had started working in 2011 since that there have been 839,532,184 cars have been made more then ,12,780,786,872 KTOE of CO₂ was produced into the air and more than 56,980,567 Invention were made & many more has happened over the Years so Offcourse over the course of these years the Things that changed would help us built Another much Better idea But for that we will be have to combine minds of the top people but HYZ Energy belives that a thinking of a Normal Peron is better then 50 Scientist so we would love to Hear the Ideas that will be Able to be turned into reality with the Course of hard work if you are the one who can or is having and Idea of Such do let us know as well.

WE ARE HYZ ENERGY

**OUR AIM IS TO PROVIDE A CLEAN ENDLESS AND
RENEWABLE
WAY OF GENERATING ELECTRICITY**

CONTACT DETAILS

NUMBER : (+974) 55822034 , (+974) 33887300

Land Line : (+974) 4486 0706

Fax : (+974) 4017 5363

**WE HYZ ENERGY HAVE AN AIM TO REMOVE THE DARKNESS OF THE WORLD
WITHOUT POLLUTING THE ENVIRONMENT.**
